

RESEARCH & INNOVATION

MAKING RURAL LIVELIHOOD SUSTAINABLE

TGG Foundation
A PUBLIC CHARITABLE TRUST

TGG Foundation has developed a sustainable farm for students in Wayanad, Kerala to stay and study various aspects of rural life and to develop a holistic model project which can be experienced by people from across the world. In collaboration with [CG Bhakta Institute for Bio-Technology, Surat, Gujarat](#)

Become a part of the TGG's Research & Innovation team!

Responsible Tourism

Build a model for sustainable and ethical tourism, which benefits all local segments of society involved, and trains visitors to care for the environment, respect cultures, and empower rural communities.

Tea Culture

Study traditional methods and develop new techniques to cultivate and process tea sustainably, and preserve its natural health benefits. Build a new model that can benefit small farmers.

Tiny Homes

Design and build an energy-efficient, air ventilated, well equipped, low cost, all weather tiny home, to be used for increasing awareness of cost effective, sustainable, and simple housing solutions.

Machines, Tools, and Equipment

Develop new tools, machines, and equipment to make agricultural activities more economically and environmentally sustainable for small farmers.

WAYS TO GET INVOLVED

- Are you a qualified student or graduate looking for experience in the fields of tourism, agriculture, building, or design? Join us to get hands-on experience.
- Do you want to witness and experience these amazing endeavors out of curiosity? Retreat to The Green Gardens.
- Passionate about sustainable rural livelihoods and wishing to support from afar? Consider a donation.

MAKE THE WORLD A BETTER PLACE TO LIVE
